

Curriculum Vitae

# LE NAM THANG

Cybersecurity Intern

## PERSONAL INFORMATION

|              |                                                              |               |                |
|--------------|--------------------------------------------------------------|---------------|----------------|
| Address      | C17 Apartment Complex, Bo De Ward, Long Bien District, Hanoi | Date of Birth | 09 April, 2007 |
| Mobile Phone | 0923 228 787                                                 | Nationality   | Vietnamese     |
| Email        | leenamthang090407@gmail.com                                  | Gender        | Male           |

## CAREER OBJECTIVE

### Short-term Goal

I am looking for a Cybersecurity Intern position, specifically in Penetration Testing, to apply my lab experience (Web Security, Binary Exploitation) into real-world projects. I aim to learn professional security workflows and contribute to the team's success while completing my degree at USTH.

### Long-term Goal

I want to become a professional Security Expert, focusing on Red Teaming. My goal is to help organizations build stronger defense systems by identifying and fixing complex vulnerabilities.

## EDUCATION

|                |                                                                                                 |
|----------------|-------------------------------------------------------------------------------------------------|
| 2025 – Present | University of Science and Technology of Hanoi (USTH) — currently a student in the Cybersecurity |
| 2022 – 2025    | Ly Thuong Kiet High School — Focus: Mathematics, Physics and English                            |

### Training Certificates & Skills

- **Web Security:** Self-studied SQL Injection and Path Traversal through hands-on lab practice (on Linux/Kali Linux); use tools such as Burp Suite, Acunetix, and curl for web testing.
- **Binary Exploitation:** Self-studied Memory Corruption techniques independently; use GDB and Pwntools to write exploit scripts and solve CTF binary challenges.
- **IELTS 6.0** (Issued: April 09, 2025)

## EXPERIENCE & PROJECTS

1. **0xHAK** | *Member* Oct 2025 – Present

0xHAK is an independent, self-organized cybersecurity team founded by last-year students at USTH — operating freely outside of any official school club structure. Learn about Linux; practice web testing through Docker labs; learn from seniors about real-world cybersecurity experiences.

2. **Urban Logistics Research Project** | *Developer Support* Oct 2025 – Present  
Support a scientific research project on Urban Logistics, assisting with development tasks.
3. **Mobile Translation Application** | *Developer* 2021 – 2022 (while in 9th grade, middle school)  
While in 9th grade (middle school), developed a multi-language translation mobile application for the City-level Informatics Competition. Built using block-based programming (MIT App Inventor); runs on Android.

## AWARDS & COMPETITIONS

---

- **Top 2** – 0xHAK Championship (organized by a student-formed team at USTH, independent of any official school club) — 18 October 2025
- **98th Place (Advanced Category)** – Hack Theon Sejong 2026 Cybersecurity Competition — 25 April 2026  
**Write-up:** <https://github.com/Writeup-Challenge-Le-Nam-Thang/Hacktheon>

## SOCIAL ACTIVITIES & INTERESTS

---

- Practice and write notes for **CTF Labs** (Binary Exploitation)  
**GitHub:** <https://github.com/Writeup-Challenge-Le-Nam-Thang/Pwn-Picoctf>

**Interests:** Football, CTF challenges & write-ups, motorcycles, and supercars.
